

← 7-10 ES6+

```

    data: {
      code,
      list
    }
  } = await axios.get('/list')
  if (code === 0) {
    this.$data.list = list.filter(item => item.length < 10)
  }
}
}
}

```

Iterator

```

<template>
  <div class="list">
    <h1>authors</h1>
    <ul>
      <li v-for="item in authors"
        :key="item">
        {{item}}
      </li>
    </ul>
  </div>
</template>

<script>
import axios from 'axios'
export default {
  name: 'Authors',
  data () {
    return {
      authors: {}
    }
  },
  async mounted () {

```

Generator

```

<template>
  <div class="list">
    <h1>authors</h1>
    <ul>
      <li v-for="item in authors"
        :key="item">
        {{item}}
      </li>
    </ul>
  </div>
</template>

<script>
import axios from 'axios'
export default {
  name: 'Authors',
  data () {
    return {
      authors: {}
    }
  },
  async mounted () {

```
